# Protected areas and conservation

## Official MPA Map

Source: IUCN and UNEP-WCMC (2016). The World Database on Protected Areas (WDPA) [On-line], December 2016, Cambridge, UK: UNEP-WCMC. Available at [www.protectedplanet.net](http://www.protectedplanet.net)

5.1% of the Global Ocean covered by marine protected areas  
Exclusively No Take = 1.23%

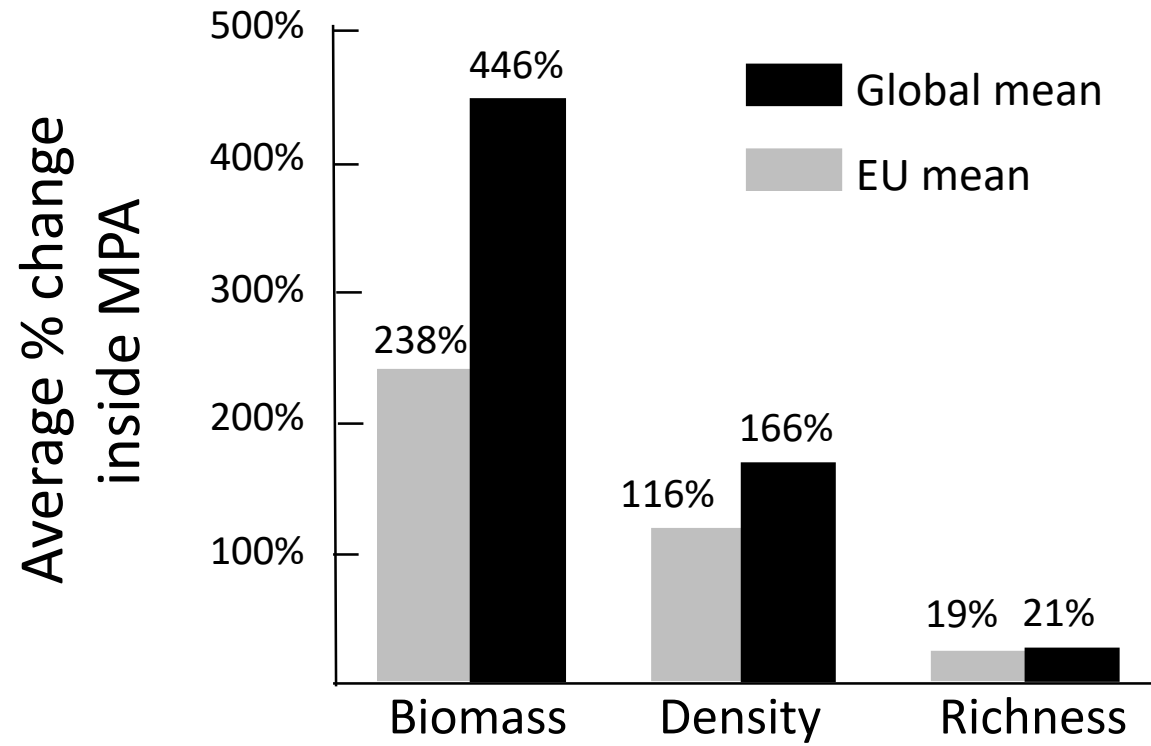

# Protected areas and conservation

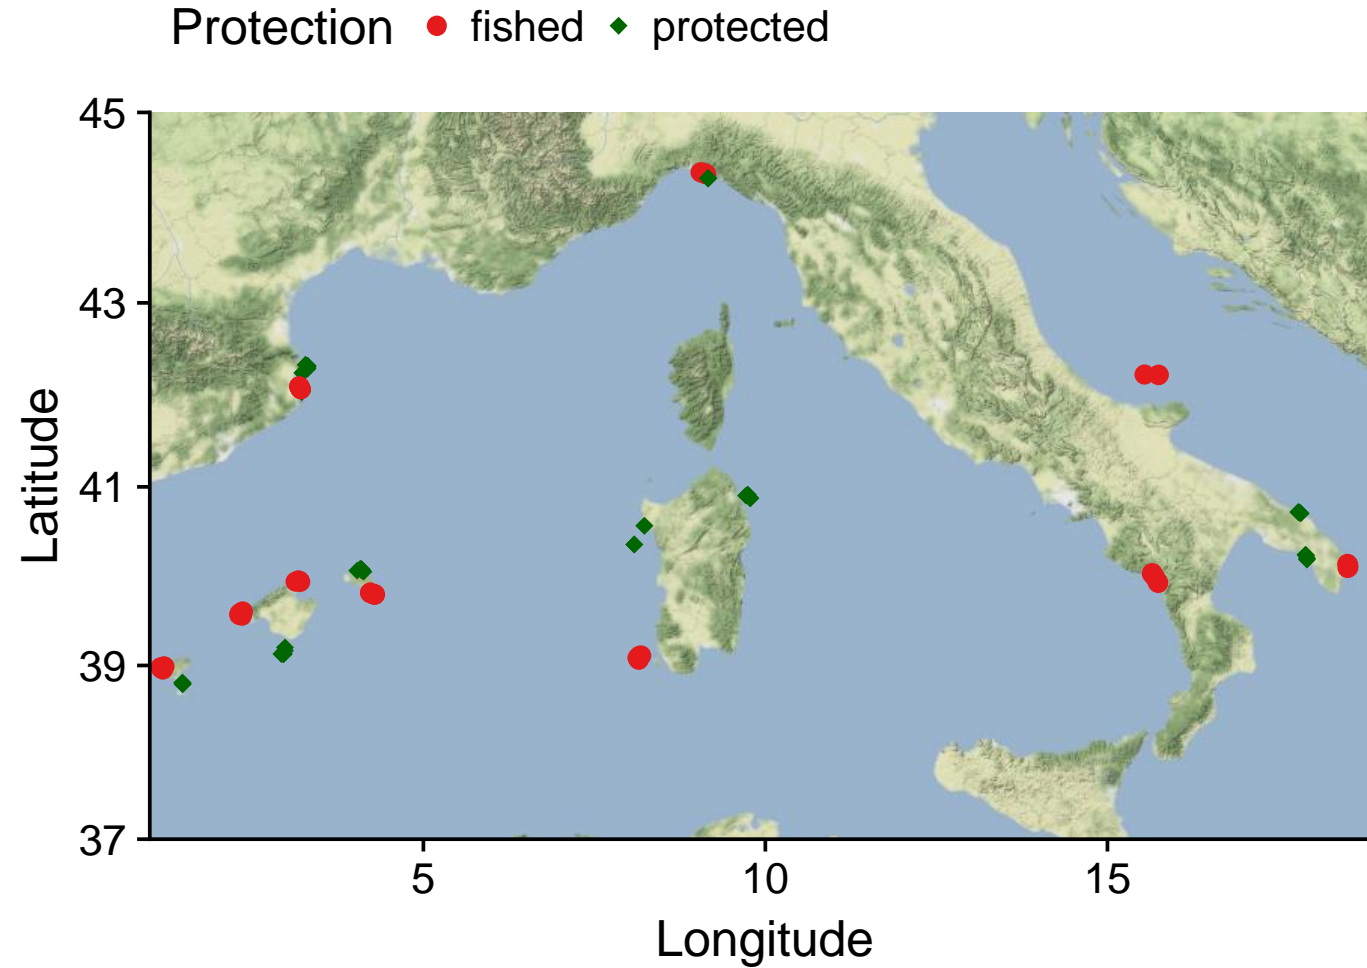

# Protected areas and conservation

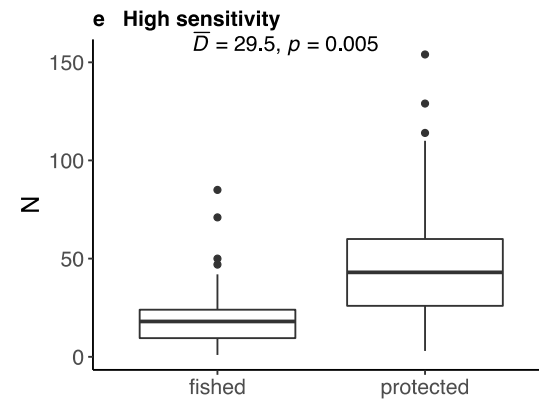

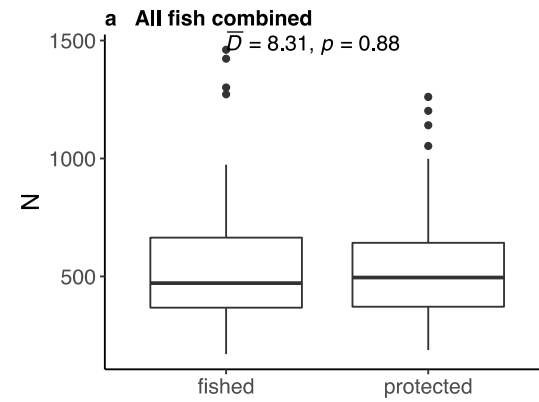

# Mediterranean MPAs: $\alpha$ - scale

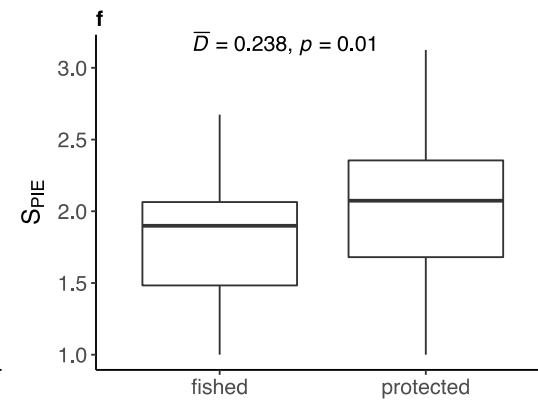

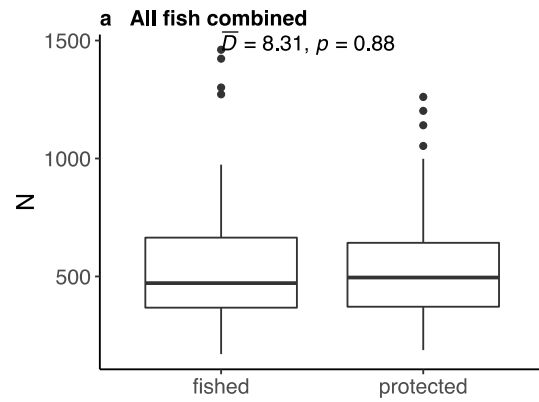

- 56 fished sites
- 55 protected sites
  - 3 transects per site
- Examine trait-dependence of protection effects

# Effect of protection in Mediterranean MPAs: $\alpha$ -scale

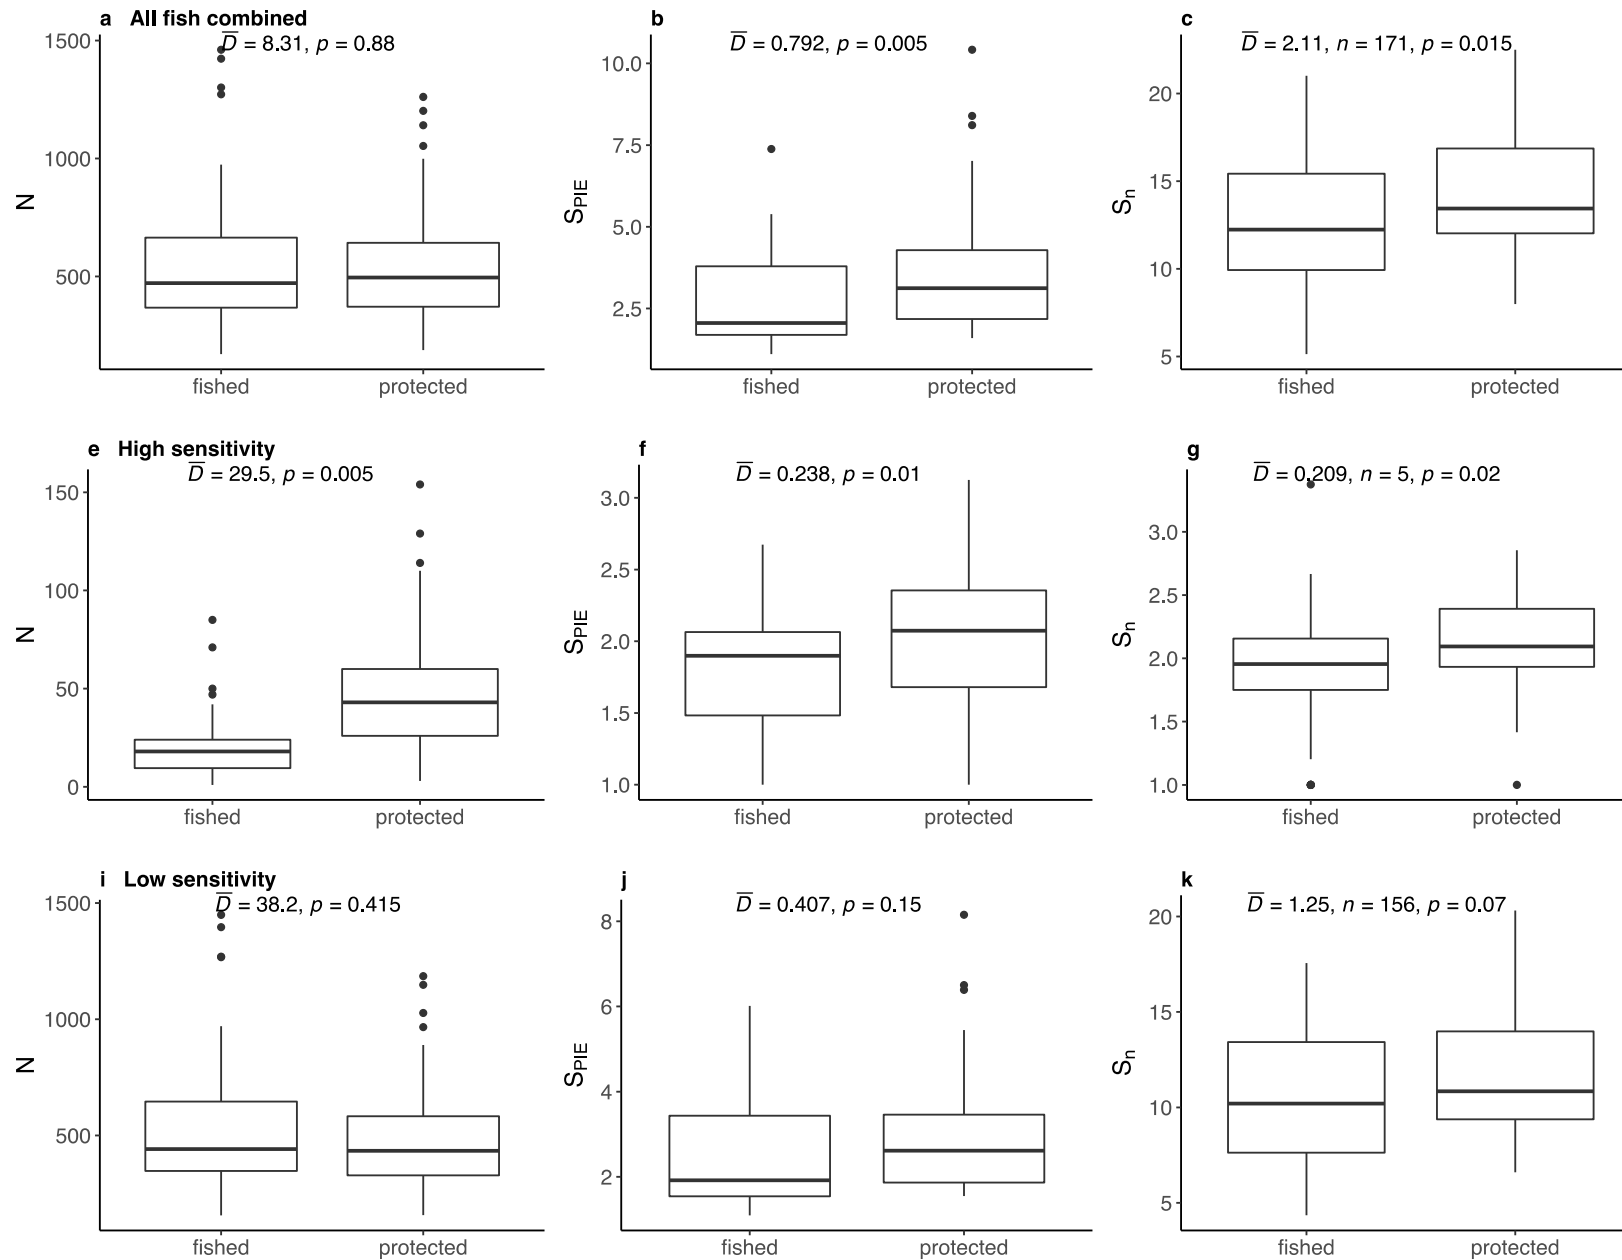

Protection

# Effect of protection in Mediterranean MPAs: $\alpha$ -scale

Protection

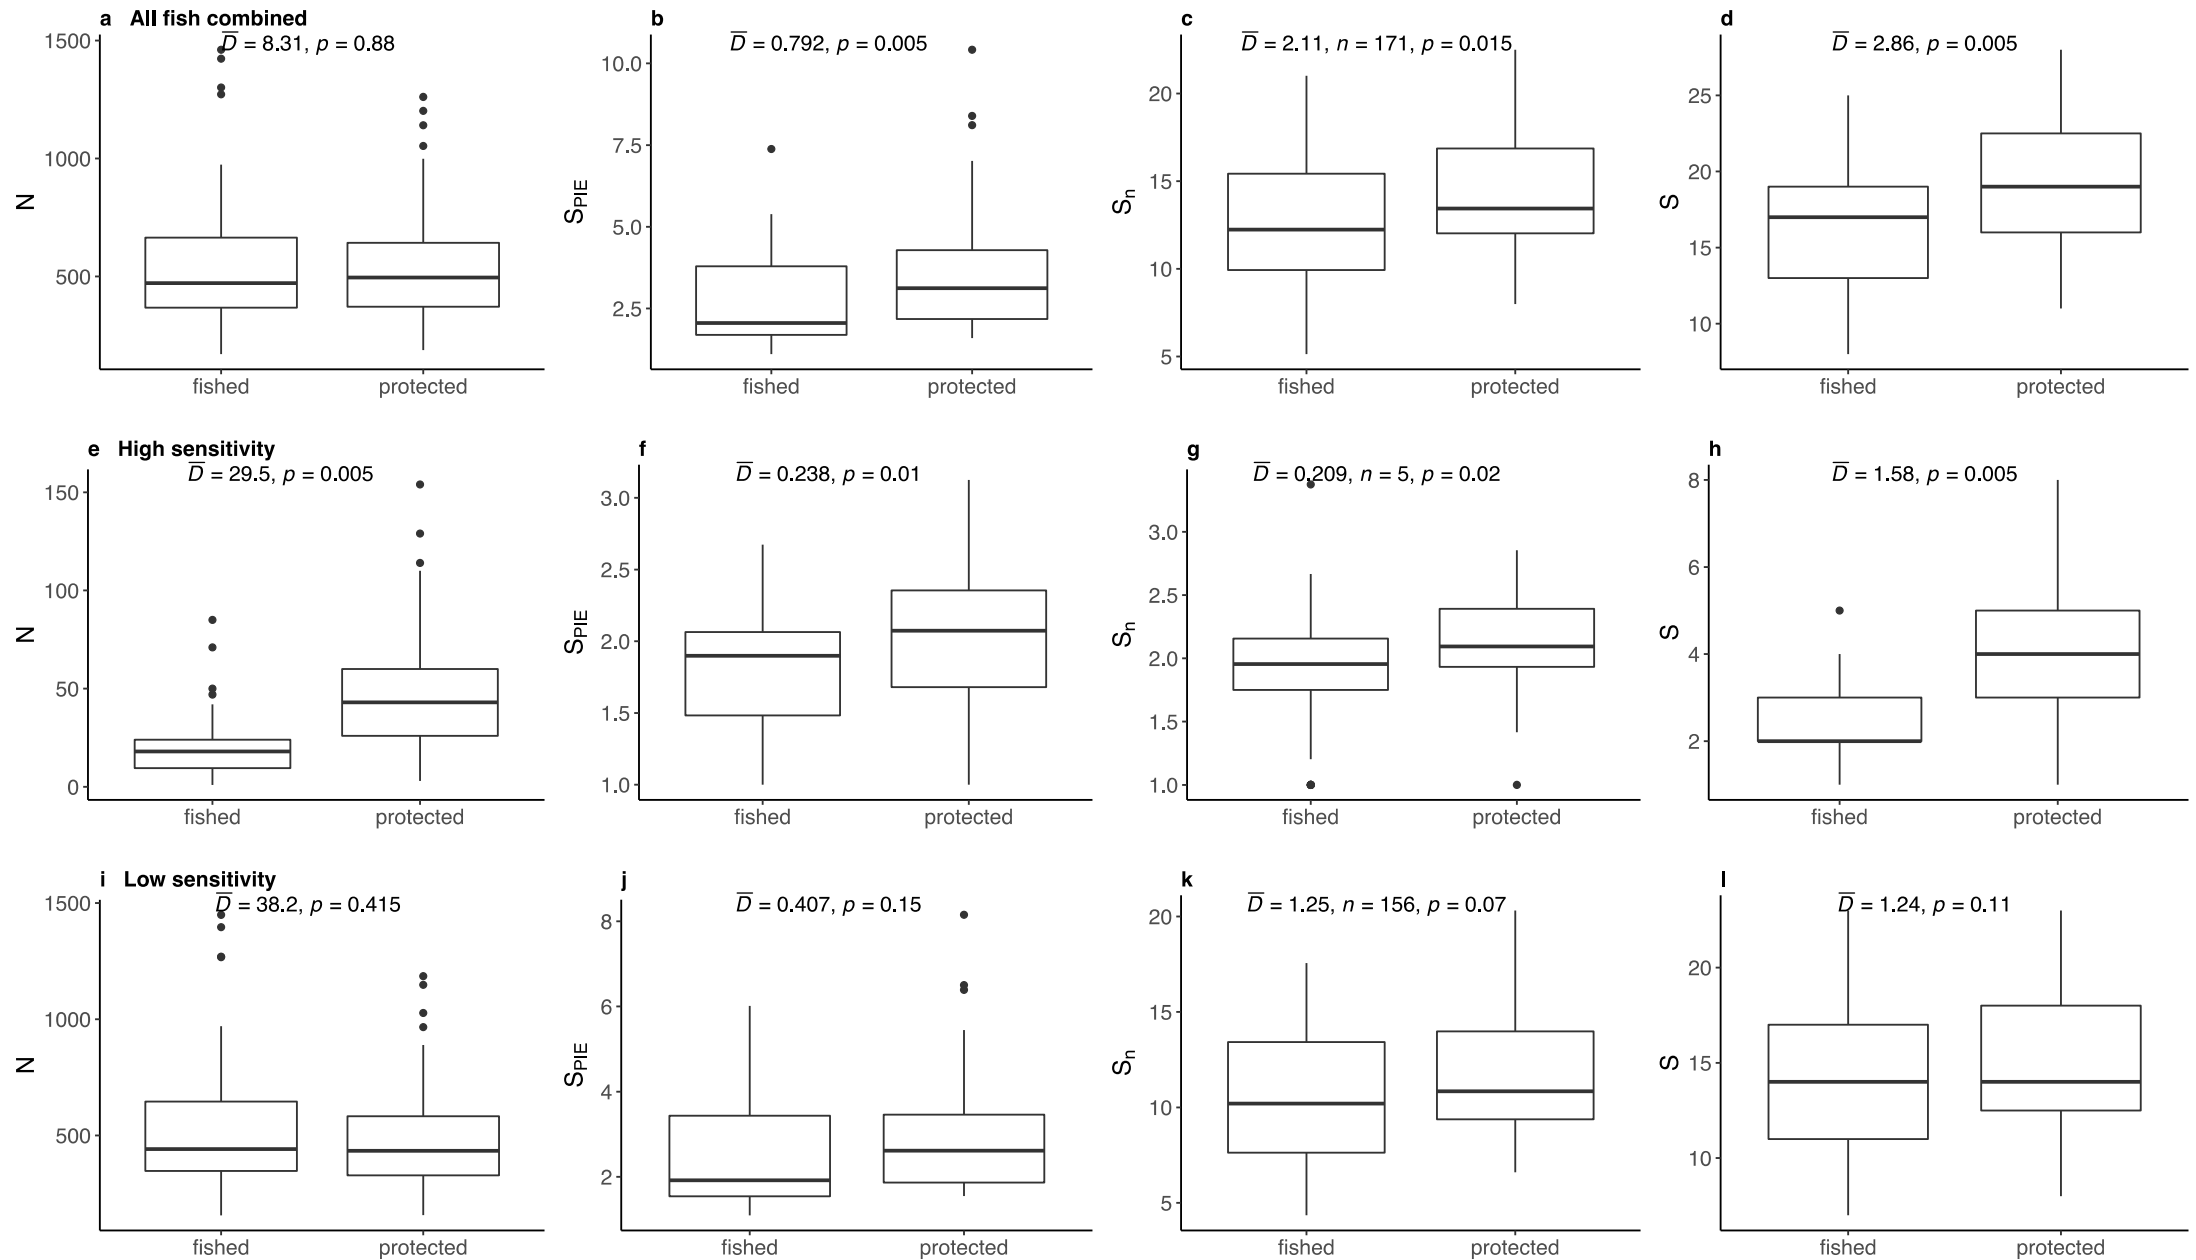

# Effect of protection in Mediterranean MPAs: $\alpha$ -scale

Protection

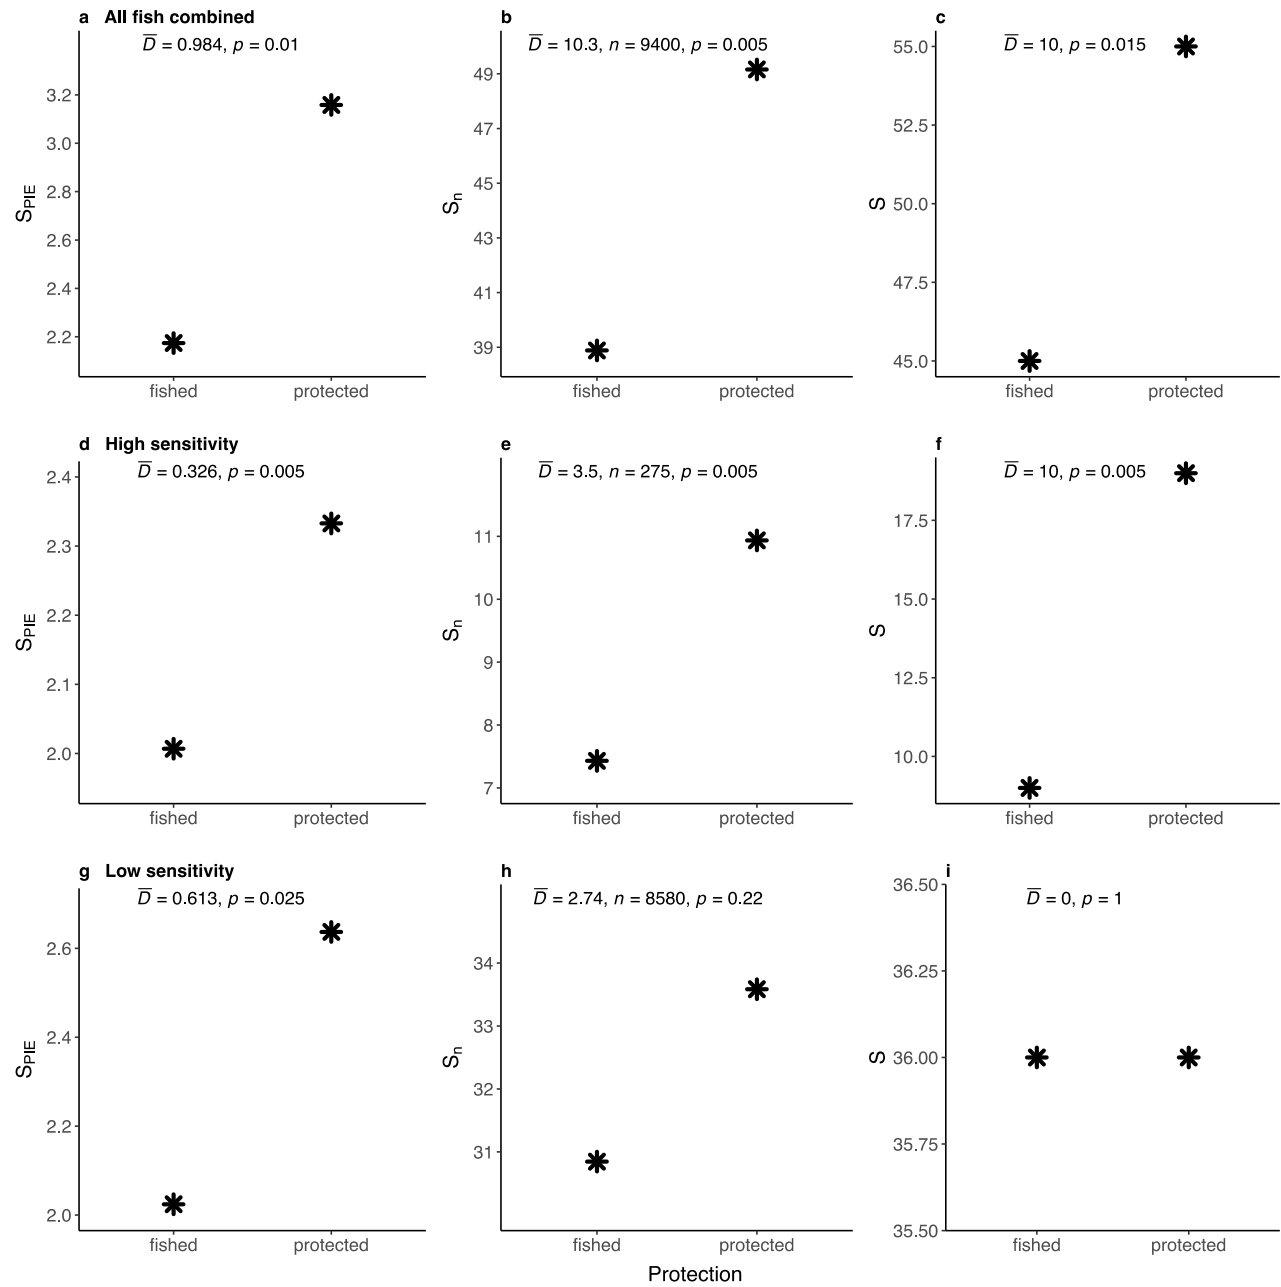

# Effect of protection in Mediterranean MPAs: $\alpha$ -scale

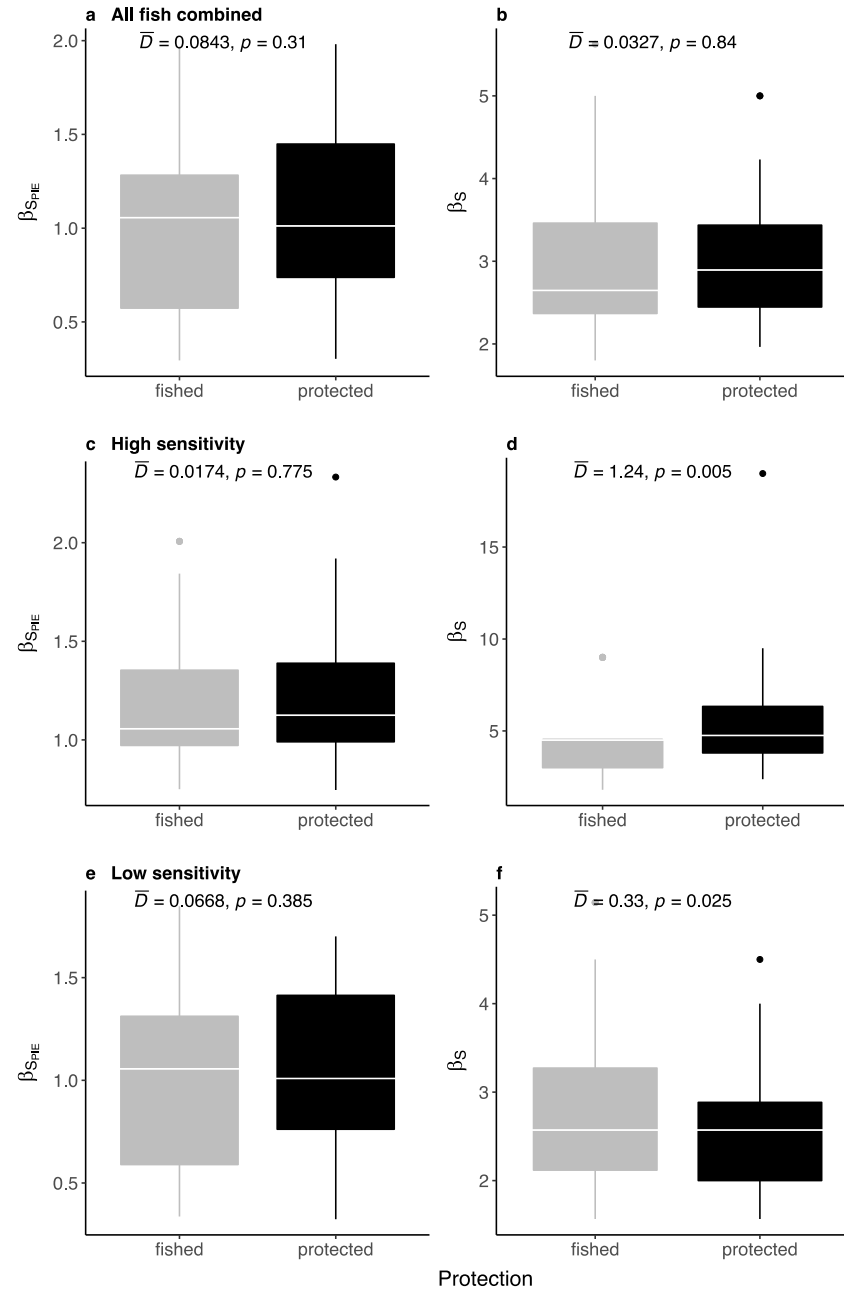

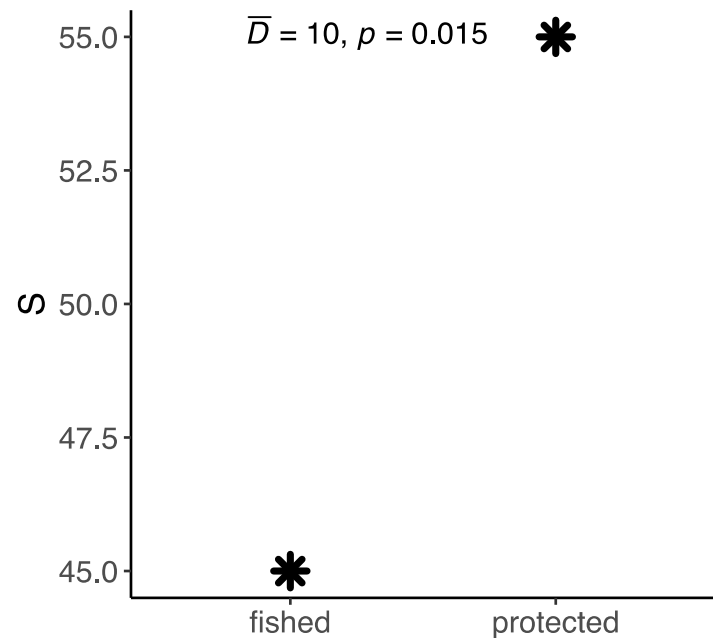

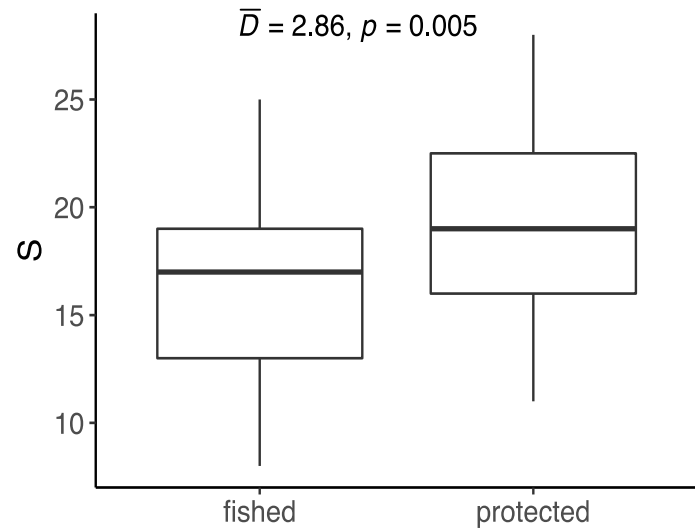

Protection

# Effect of protection in Mediterranean MPAs: $\gamma$ -scale

# Effect of protection in Mediterranean MPAs: $\beta$ - scale ( $=\gamma/\alpha$ )

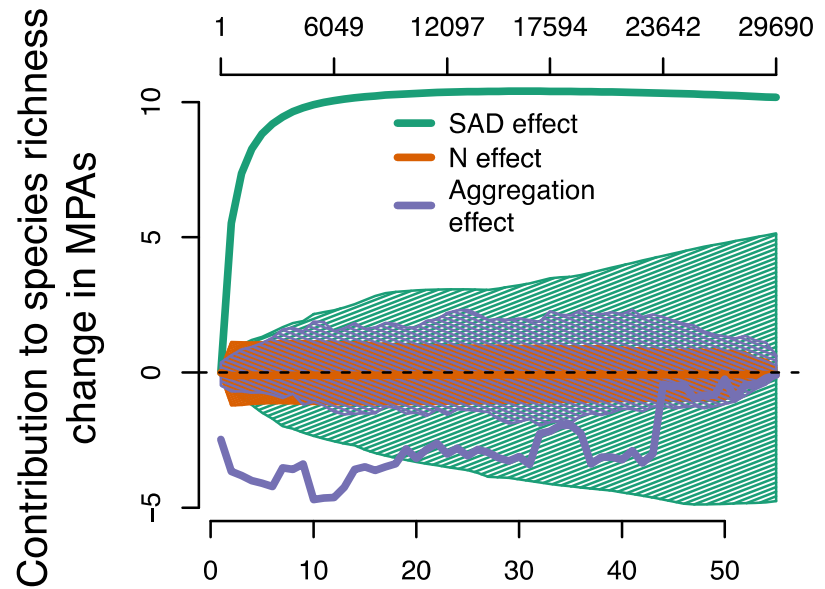

But...we want to quantify component contributions (N, SAD, aggregation) to MPA effect on species across scales.

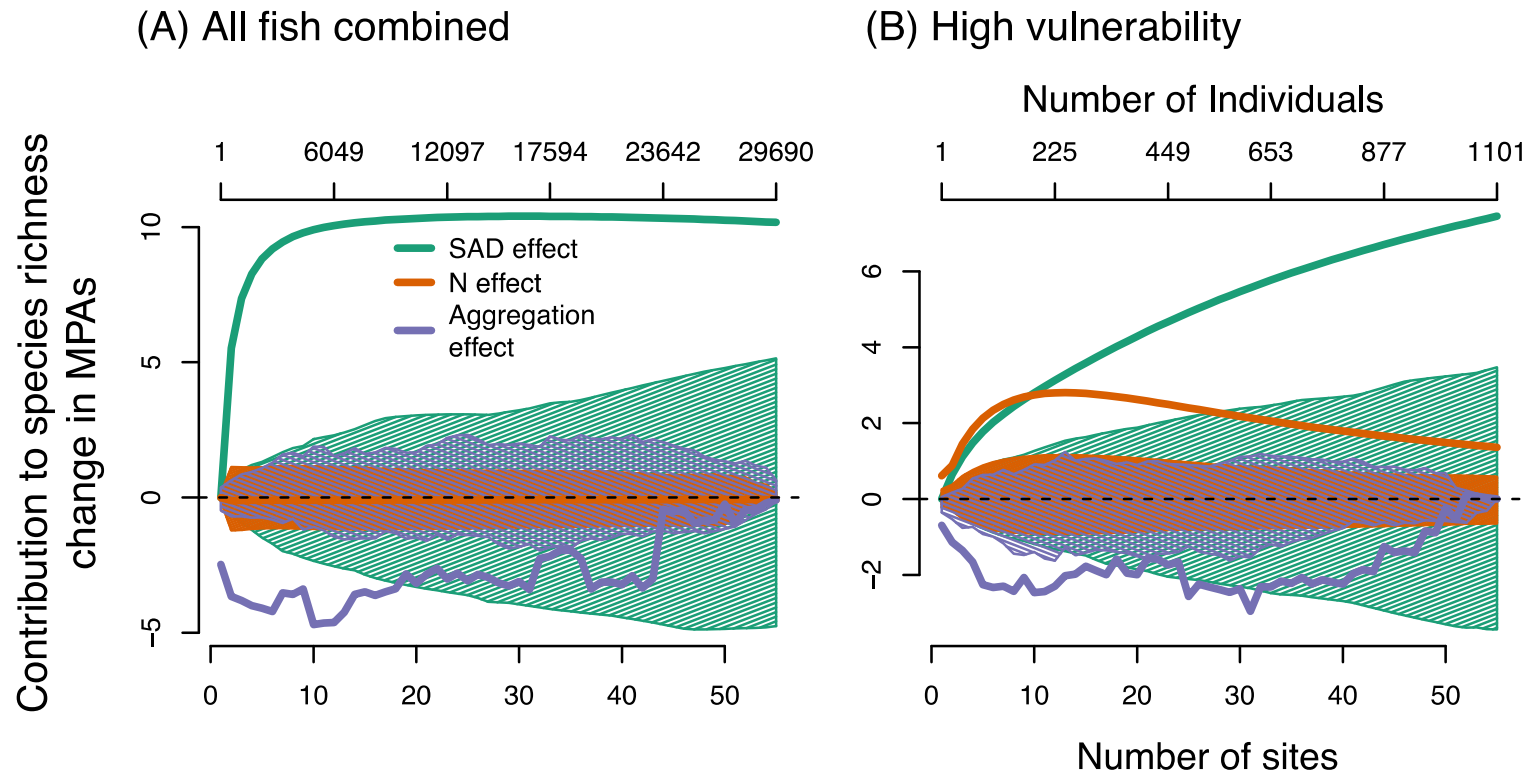

# Effect of protection in Mediterranean MPAs: all-scales

(A) All fish combined

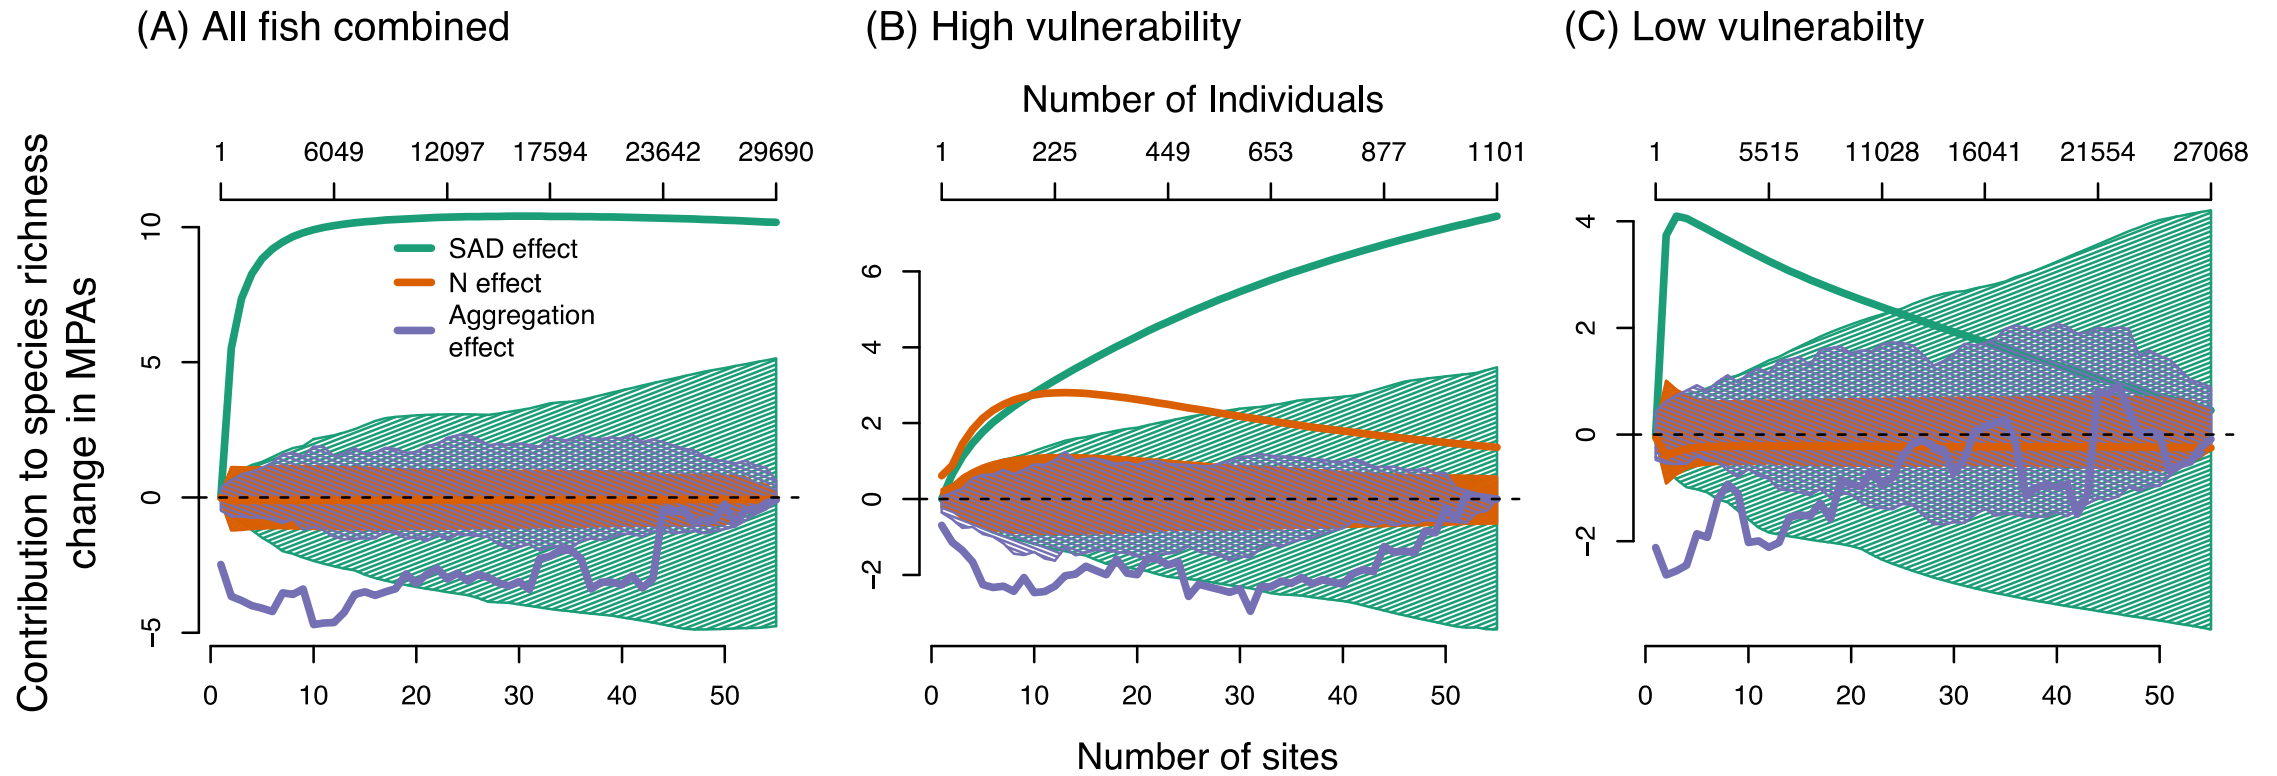

# Effect of protection in Mediterranean MPAs: all-scales

# Effect of protection in Mediterranean MPAs: all-scales

# Take home

- Changes to SAD dominate MPA effect on species richness
- Exploitation homogenizes the part of the fish community most sensitive to fishing
- Regional system of MPAs reverse this (by  $\boxed{\uparrow}$   $\beta$ -diversity)
